As The Parish Council draws up the Neighbourhood Plan, would you prefer:

that any identified and required development is spread out both geographically and over time?
 that any identified and required development is condensed both geographically and over time to minimise disruption?
 we would prefer no development even if it meant no financial support for struggling services?

That completes the infrastructure survey. Many thanks for your input.

From the data collected, which is auto analysed to produce graphical evidence as to the feelings you have had on many subjects, we will piece together the actual requirements only and then draw up the plan. The plan will go to consultation both to Mid Sussex District Council to ensure it is aligned with their policies and Directives, as well as everyone in the Parish at several events, where all opinion will be heard, this survey is important to show consensus and that not just a vocal minority have input into our plan, please ensure your views are counted, as having a plan rejected at referendum by you the voters, will mean we have no plan and then get what we are given and not what we need. It is imperative we get everyone to input into the 2 surveys

so please help by checking with all your Neighbours they have completed it. If we do not have it exactly right and it is not carried at referendum in the next set of elections, we have no defence to mass development at all. Thank you again and I look forwards to publishing the results and plans in full, and presenting them to you in the Village Hall after Easter. Mark Syrett
