

Neighbourhood Plan Objectives @ 24/01/15

1. Conserve and enhance the environment of the village in order to maintain its distinct rural identity and outstanding landscape setting.
2. Maintain and enhance existing and establish new local services and facilities.
3. Increase the population at a similar rate to that which has occurred in recent years (average 5 properties per year, around 100 properties in total) whilst maintaining the current age.
4. Support local businesses and provide enhanced employment opportunities within the parish including home working.
5. Maximise use of the local bus service to improve its viability.
6. Minimise the impact of road traffic on the village through the provision of limited traffic calming and adequate parking in any new developments.
7. Minimise the adverse environmental effects of new development and provide energy reduction and sustainable energy opportunities for the whole village.

Following consultation, there were potential concerns with Objective 3. We are therefore proposing the following wording:

3. Increase the population and meet their housing needs over the planned period with emphasis on housing that addresses the needs of younger people and families to help maintain the village age profile

Do you prefer this wording of Objective 3?
